

What Should I enter for my Server?

If you are using the Public Visimeet Service, the Server is – **visimeet.iocom.com**

If you are in an organization with a private server, you will need to enter the server that was on the email and installation instructions from the signup process or by your UCS administrator.

Enter the Server name in the field titled “Server.” To do so simply type the name of the Server in the blank field or clear the field to enter a new Server name.

Once you have entered a Server it will be saved in the drop down list and can be seen when clicking the down arrow.

You can delete a Server from your list by choosing the Server and clicking the “X”
